

CAREER GOAL

I'm a Full Stack Developer looking for challenging and rewarding opportunities while using open sourced materials to design and create back-end functionalities. Knowledgeable in application development, web development and improving applications. Collaborated with co-workers to establish backend conventions, principles, and patterns.

SKILLS & TOOLS

The diagram illustrates the relationship between various technologies in web development, categorized into three main groups: Front End, Back End, and Others. Each technology is represented by a dark gray box with white text. Lines connect related technologies, showing their interdependencies or interactions.

Front End

- HTML
- CSS (SASS)
- JavaScript/jQuery
- Vue JS
- Vuetify
- Bootstrap
- Materialize
- Bulma

Back End

- PHP
- Laravel/Code Igniter
- Docker
- MySQL
- Vuex
- Java

Others

- Composer
- Visual Studio Code
- PHP Storm
- Sublime
- Agile/Scrum/Kanban/Sprint
- GIT/SVN
- JSON
- Github/Bit Bucket
- Rest API
- NPM
- AJAX
- WordPress
- Workbench
- Slack
- Laragon
- CircleCi
- Backlog
- Jira
- cPanel

```
graph TD; Testing --- UnitTest[Unit Test]; Testing --- TDD; Testing --- IntegrationTest[Integration Test]; Testing --- TestCase[Test Case];
```

The diagram shows a central node 'Testing' connected to four other nodes: 'Unit Test', 'TDD', 'Integration Test', and 'Test Case'.

EXPERTISE

- Web Development
- Mobile Development
- Cross-Browser Compatibility
- Responsive Design
- UI/UX Design
- Database Architecture
- Agile Methodologies
- Specification Document
- Coding Standards
- Site Troubleshooting
- Server Management
- Clean and Maintainable Coding Structure

EDUCATION

**BS Information
Technology Major in Web
& Mobile Development**
University of St. La Salle
2012 - 2017

AWARDS

Masskara Hackathon 2016
- Winner
